Professional Experience:

Project Development and management
June 2024 - Feb 2025| AgriXpert Project

- Assisted in developing AgriXpert, a platform designed to provide farmers with real-time agricultural insights, weather forecasts, and market trends.
- Contributed to features such as crop management, yield prediction, and farm analytics, improving accessibility for users.
- Collaborated with the team to enhance UI/UX design, ensuring an intuitive interface for farmers and agricultural businesses.
- Helped refine and test key functionalities, ensuring smooth performance and usability.

Software Developement

January 2020 - March 2024 | Car wash Company

- Assisted in designing websites and mobile apps to enhance user experience and engagement.
- Contributed to a company website redesign, helping improve web traffic and user feedback.
- Participated in client meetings to gather feedback and refine design concepts.
